

- **Multidisciplinary Senior IT & Technical Support Engineer and Full-Stack Developer** with expertise in cybersecurity, ZTNA, and enterprise infrastructure.
- Proven track record delivering L2/L3 technical support, managing complex SaaS and on-prem environments, and developing full-stack tools that streamline operations and enhance user experience.
- Skilled in automation, scripting, and infrastructure management across Windows, macOS, and Linux environments.
- Fast learner with strong communication skills, passionate about helping people, sharing knowledge, and building efficient, secure, and scalable systems.

Military service: Technical Support Engineer – Tier 2, Air Force, IDF (2018-2021)

- Providing 24/7 technical support, maintaining network, software, and hardware, and coordinating with qualified technicians as needed.
- Creating and editing videos with Adobe Premiere Pro and After Effects.
- Repairing, and improving network, video, audio, and electrical cables.

Work Experience:

2023-Present: **Technical Support Engineer – Tier 3, IT Engineer & Full-Stack Developer, Cyolo**

- Deliver L2/L3 support for enterprise deployments across SaaS, on-prem, and DMZ environments.
- Diagnose and resolve complex issues involving SSO, SCIM, LDAP/S, RDP, VNC, Telnet, HTTP/HTTPS, SSL/TLS and SAN certificates, licenses, and complex network configuration on Linux, Windows, and macOS.
- Manage and troubleshoot Docker Compose deployments, reviewing configurations and logs across multi-site clusters.
- Log detailed Jira reports for Product and R&D teams with clear bug documentation and reproduction steps.
- Maintain KBs on Confluence, Zendesk, and internal systems for customers and staff, and lead training sessions.
- Handle daily Zendesk tickets including incidents, bugs, and configuration requests, while assisting customers via Zoom and Microsoft Teams.
- Build automation workflows in PowerShell, Python, and Shell for onboarding, offboarding, and monitoring.
- Oversee VMware ESXi, Proxmox, and AWS environments supporting production, development and testing.
- Oversee 50+ SaaS platforms, managing SSO/SCIM integrations, licensing, cost, and user lifecycle automation.
- Own and secure enterprise's IT infrastructure (AzureAD, Entra ID, M365, Exchange) in full SOC2 compliance.
- Build Cyolo Back-Office, an internal and partner full-stack platform for managing customer tenants and licenses.
- Build and maintain Cyolo Helpdesk, a full-stack add-on to the core product enabling helpdesk admins to fully manage user's lifecycles. Maintain documentation, manage updates, and provide ongoing support.

Education and Courses:

2022-2023: Full-Stack Web Development Certificate, Coding Academy

2021-2022: Computer Engineering Studies, Polytechnique Montreal, Canada

2020 Computer Network Management Certification, Air Force, IDF

Tools and Technologies

- ☑ **Engineering:** JavaScript, Python, C#, PHP, MATLAB, Bash, PowerShell, Shell; React, Vue.js, Angular, HTML, CSS/SCSS/SASS, Responsive Design, Redux; Node.js, Express, REST APIs; MongoDB, MySQL, SQL Server; **Database tools:** phpMyAdmin, Studio 3T; **Dev tools:** Visual Studio Code, Postman; **Web:** SaaS platforms, PWAs; **Principles:** Object-Oriented & Reactive Programming.
- ☑ **Platforms & Infra:** Docker, Docker Compose, Git, GitHub; Linux (Ubuntu), Windows, Windows Server, macOS; AWS EC2/S3; VMware ESXi, Proxmox; multi-OS virtual machines.
- ☑ **Security, IAM & Networking:** AzureAD, Entra ID, Okta, Active Directory, GPO, LDAP, SSO, SCIM, SAML, OIDC, RBAC, Microsoft XDR; ICAP, DNS records, firewalls, proxies, Fortinet; SSL/TLS & SAN certificates, JWT.
- ☑ **Ops, Monitoring & Collaboration:** Grafana, Prometheus, BetterStack; Zendesk, Jira, Confluence; SSH, SCP, RDP, VNC, Telnet, PuTTY, AnyDesk; Microsoft Intune; Microsoft 365 Word, Excel, PowerPoint, Outlook, OneDrive, SharePoint, Visio; TimeClock365, Gong, Salesforce, SalesLoft, TravelPerk, HiBob; Figma, Adobe Suite, Avocode, Lunacy; Zoom, Slack, Microsoft Teams.
